

SOUTHAMPTON UFO GROUP

13 Years of Investigation

NUMBER 171 & 172

JAN / FEB 2005

E.MAIL ADDRESS : SOUTHAMPTON@SUFOG.FREESERVE.CO.UK

CHECK US OUT AT THE FOLLOWING WEBSITE :

<http://www.sufog.freemove.co.uk>

Well readers, the time for change has finally arrived. You will notice that this edition has some slight changes that will be carried over to the forthcoming editions. If you go to page 7 of the newsletter (Or should it be a magazine as we now have 24 pages?), you will find out about other changes taking effect from June 2005 that will effect ALL members. Please support us in these changes as we have to move with the times and the Paranormal has arrived in SUFOG. This will not effect the 20 pages of UFOlogy, it just means that there will be an extra 4 pages of Paranormal information, news, views, articles, newspaper coverage.

This edition continues with part 2 of Malcolm Robinson's article, and there is a look at the flood of newspaper articles in January/February following the new Freedom of Information Act that took effect from January 2005. Also there is a look at UFO activity in the UK and a look at UFO reports from around the world.

As I have always said, the newsletter (Magazine) is for the readers and I need your help and support in moving the newsletter into a new era. So, if you come across any

information regarding local UFO reports, reports from around the world, newspaper articles on UFO's, Ghosts or other Paranormal events that we can include in the Newsletter, PLEASE send me a copy or notify me so I can consider including it in the newsletter. If you have any views or comments, then I would be more than happy to hear from you and if you have any suggestions, then please let me know. The next edition of the newsletter will be 24 pages long and I have to fill them, so please help.

Many thanks for your continuing support.....

CELLULAR MEMORY. (Part 2)

[The transfer of characteristics and behaviours from the donor to the recipient via the cells of the transplanted organ]

(An Article by Malcolm Robinson Strange Phenomena Investigations. (November 2004)

CASE STUDY 4

A 29-year-old lesbian, who was a serious fast food junkie, received the heart from a 19-year-old woman vegetarian who was 'man crazy'. The recipient reported that after her operation that eating meat made her sick and she was.....wait for it....no longer attracted to women. Indeed she became engaged to marry a 'man' !

One of the more unusual cases that I noted whilst watching this TV documentary the other evening, was a lady called Claire Sylvia. Claire received a heart and lung transplant and like most cellular memory cases, after the operation she started to crave for beer and chicken nuggets, neither of which she had a taste for prior to the transplant. She later tracked down who her donor was and was astonished to learn that her donor's favourite food was chicken nuggets, indeed, he had just purchased some chicken nuggets prior to being involved in a motorcycle accident and these nuggets were found inside his motorcycle jacket.

His Favourite Making Up Saying.

CASE STUDY 5

You know, the more one looks at the testimony and case studies as I have done for this article, the more the subject of cellular memory astounds me. Here is another case that I come across. After a young man came out of his transplant

surgery he said to his mother, "*Everything is copastic*". His mother stated that her son had never ever used those words before the surgery but now he was saying it all the time. It later transpired when he tracked down the donor's wife, that this sentence "*Everything is copastic*". Had been used by the donor to signal to his wife after they had had an argument, that everything was okay. He used it all the time. The donor's wife was reported as saying that her husband and herself had had an argument just before his fatal death and they had sadly never made up.

My final example of what could be 'cellular memory' will shortly bring me into something which I was asked to keep out of my article by my girlfriend due to the strong possibility, that this article may well, (depending on who reads it) cause concern for anyone going under the surgeon's knife to await a transplant. Before we go their however, let me tell you about this case and how it leads me into what could be a controversial topic.

Murder.

CASE STUDY 6.

This case study comes from Paul Pearsall, MD a psychoneuroimmunologist, (glad I don't have to type that a few more times !) Anyway Paul has done his own research into cellular memory and the possibility of transfer of memory through organ transplant. He has reached the conclusion that cells of living tissue have the capacity to remember. What follows is one of Paul's best cases.

An eight-year-old girl received the heart of a ten-year-old girl who had tragically been murdered. Not long after the transplant the recipient of the heart, had terrible and distressing nightmares of a man murdering her donor. The dreams got so bad that her family had to seek out the services of a psychiatrist. Now such was the distress of this young girl and the vividness of her dreams more so the face of the murderer in her dreams, that they took the unusual step of contacting the police. They informed the police all of what the little girl had described in her dreams. The face of the man, his clothes, the weapon, the location, the very

clothes that he wore. Not only that, they also told the police what the little girl who was murdered said to the murderer and who told the donor recipient girl in her dream. Using the young girl's description, the police managed to track down and catch the killer who was easily convicted with the details provided by the donor recipient.

Now this leads me into what I mentioned above, the territory that my partner said I shouldn't mention for fear of playing on the minds of those who require transplants. But when one looks at the overall picture of this phenomenon, I've always said that no matter what, we should always relate the facts, put forward suppositions for other people to assess and look at. This is the dilemma.

INHERANT DANGERS

If the phenomenon of cellular memory is true, does it have any inherent dangers? What I mean is, if someone were to be given the transplanted heart of a serial killer, would macabre and evil thoughts surface to the recipient individual making him or her commit a crime that previously went against his or her own physiological make up? And if so, how would this go down in a court of law? Would they try and get out of this crime on a technicality? People are now accepting that some people have these donor implanted 'inherited memories', but would this be good enough to present as 'evidence' in a court of law? To re-iterate. Say someone who has received the heart of a serial murderer, goes out to commit a crime, their defence is to say this is something that they would never have done prior to receiving the heart of a killer and as such they don't want to go to jail because the donor's 'memories' has somehow infringed onto their very psyche and led them to commit this atrocity. Now tell me this reader, which lawyer would take that one up !!!!

One lady doctor who was interviewed on this TV show stated that it was hard enough to get organ donors at the best of times, but if people were suddenly to be informed that if they have a transplant that they 'might' have

the other deceased person's memory', well that could really reduce the stock of organ donations to hospitals around the world. Fair point, I mean, if you the reader of this short article had to go into hospital to have a transplant and knew that cellular memory may be something that could effect you, would you still be happy to go through with it? (Of course if it was a matter of life or death 'we would') But would it make us concerned to think twice about it ? We learned from the programme that nearly all (if not all) hospitals won't reveal who the organ donor was so most people would have a hard time trying to find out if their sudden and compulsive desire to climb trees was just something that they wanted to do, or was something that someone else 'had done'.

CLONING

Then of course we could extend this point to cloning. If we took stem cells from a donor and used them to create another life form, would that cloned life form have a soul a mind, child hood and adult memory? Cloning another human being is not pie in the sky or some Frankenstein improbability; it's something that is just around the corner. Dolly the sheep for instance was the first step on the cloning ladder, will a human being be next? Are we playing God, where does medical science breach what's right and enter areas that to some, seem improper? And who decides this? I have no problems with medical science trying to find cures for cancer and other human illnesses. Science is ever progressing and we will never stop those young entrepreneurs of the medical world having a go at medical issues. Fair play to them I say. But do we create a Frankenstein monster by prying too deeply into areas that we really should leave alone? How far can things go? How far 'should' things go. ?

KIRLIAN PHOTOGRAPHY

Another interesting concept that was giving airtime on that TV show which brought me to write this piece was, that of Kirlian

photography. Basically this is a photographic process that captures the auras or biofields of persons or objects within a photograph. What happens is the subject is photographed in the presence of a high frequency, high-voltage, low-amperage-electrical field, which shows glowing, multicoloured emanations which some class either as auras or biofield. These emanations can either be from a 'subjects' fingertips, or in some of the earlier classic examples, a part of a leaf was cut and then put under the Kirlian device, and much to the astonishment of those gathered, all could clearly see that although cut off, one could make out the 'outline' of the cut leaf in the Kirlian photograph.

Kirlian photography was named after Seymon Kirlian, a novice amateur inventor and electrician of Krasnodar, Russia, who pioneered the first efforts on the process in the early 1940's. Is Kirlian photography a paranormal phenomenon then or is it something on the fringes of a science that we don't fully comprehend? For me I think we 'are' indeed photographing a 'bio field' or aura of a human being. We are capturing the energy from ourselves. (Life force ere happy, sad, ill, or in good health all through their Kirlian photograph. Of course something like this, although having been around since the 1940's, is still not readily accepted within the halls of medical science. Fringe science and belief systems are always up against it when it comes to claims such as this. But like I have said many times before, just because something 'seems' silly and ridiculous, does that necessarily mean that it is ! Do we throw the baby out with the bathwater, because we don't care to look that little bit further? Where would the pioneers of medical science and Industry be if the likes of Marconi, John Logie Baird, the Wright Brothers etc just said,

"Ah well, everyone is giving me a hard time saying that what I'm trying to do won't work or won't get off the ground, maybe their right, I'll just pack it in".

I hope the reader can see what I mean.

Science will never go forward if we turn our back on what 'appears' to be ridiculous. Some people laugh at UFO and Paranormal

researchers thinking we're all a bunch of (to put it lightly) 'nutters'. Well OK maybe some of them/us are. But in the main, UFO and Paranormal researchers are just trying to find out what's going on, to get to the truth and claims of UFO sightings/abductions and ghosts. Researchers have to ride roughshod over comments by others, which can cause pain and anguish. One has to have a tough skin whilst working on fringe sciences. But for all that many stay the course because they 'know' that there is more to learn and that science does not in any way shape or form, know it all. The planet Earth is but a school where each and every one of us is learning. We don't all want to be soldier's sailors or men of the cloth. Each one of us has their own direction in life. One should never knock another for their beliefs or aspirations. Life is partly about gathering information, and the subject of cellular memory is as interesting as any number of 'fringe beliefs' (if not more so) I say the above, as I mentioned this television programme to a work colleague the following day and she replied by saying, *"What nonsense"*. I questioned her as to why she felt it was nonsense, as she hadn't watched the programme to reach that opinion. She replied with, *"But it stands to reason doesn't it ? Something like this can't happen"*. Oh the joy's of one-sided blinkered opinion!!!!!!

Professor Gary Swartz was interviewed on this TV show about cellular memory and amongst many other things he said, he mentioned this. If we look at the sky at night, what we are seeing is the light coming from stars and planets that exploded and died millions of years ago, and the light from their explosions is only now reaching us. So in effect, energy, be it light or whatever, never dies, it moves forward. Another way to look at it would be this, when we heat a block of ice, what does it do? It melts into water, it changes. When a flower dies, is that it, ? No it returns the following year. When the leaves on a tree fall in the autumn, is that

it,? No they return again, a 'different cellular rebirth occurs'. When a human being dies, what happens. ? Well that my friends is the base work of another SPI article.

MALCOLM'S SUMMING UP

In summing up the above then, all I can say is that clearly there is something happening here, of that there is no doubt. Now whether this is just pure coincidence as Jeff Punch a transplant surgeon from the University of Michigan states, or indeed there really is some form of genetic cellular memory, which is deeply ingrained within the very fabric of the DNA, which makes up each and every one of us, is open to question. We have the cases, and I guess this is just the tip of the iceberg. I'm sure there are many more cases 'out there'. What I will say is this. If this truly is cellular memory that's giving recipients their 'newly found' thoughts and talents, then one must accept that this is a natural (if not wonderful) thing, it's not spiritual, it's not even paranormal. It's purely the wonder of the human body and all it's intricacies. But then dear reader, who made the human body!!

© **Malcolm Robinson (Founder Strange
Phenomena Investigations) 2004.**

Notes:

The first successful transplant of a living human kidney was in Boston in 1954.

Dr Christian Bernard completed the first successful heart transplant in South Africa in 1967.

UK UFO Roundup News.

The driver involved in the car accident which resulted in the death of Dr. John Mack in London in September of last year has today been arrested and charged after reporting to a police station to answer his bail.

He has been named as Raymond Czechowski, aged 50, of 8 West View Court, Elstree, Boreham Wood, London.

He has been charged under Section 3A of the Road Traffic Act of causing death while driving without due care and attention and while under the influence of alcohol.

He is due to make his first court appearance on the 27th of January at Brent Magistrates Court.

Glasgow Herald... 14th January 2005... In Pursuit Of The Alien Dollar

IT'S not often that people are united by aliens, but that's exactly what will happen if plans to twin Bonnybridge, near Falkirk, and Roswell, New Mexico, go ahead. In early March, Billy Buchanan, councillor for Bonnybridge and depute provost of Falkirk Council, will be leading a fact-finding mission to the US's epicentre of UFO activity and he hopes to form a long-term partnership.

The Shropshire Star ... 21st January... Experts Join Debate On Mystery Light

Astronomical experts have joined forces with puzzled Shropshire residents in a bid to identify the mysterious beam of light spotted in the county's skies.

People across the county stopped in their tracks as a massive beam of light lit up the early morning gloom on Tuesday. But no-one could explain what caused the eerie light which

disappeared three seconds later.

Scarborough Today... 1st February Bright lights spotted in sky

A series of moving bright lights were spotted in the sky off Scarborough - cementing claims that the East Coast is the UFO capital of Europe.

Pat Glenwright, of Grange Avenue, saw the lights shoot across the sky at 4.30pm yesterday.

She said: "There were about 14 so it definitely wasn't an aeroplane. They were flying in a group and it looks from here as though they were the size of light bulbs."

The Wisbech Standard... 10th February... UFO Sighting In Chatteris First Of The Year

Strange, bright lights seen from the sky in Chatteris were reported to the Ministry of Defence last month and was one of Britain's first reported UFO sightings this year.

This observation, which was reported by a member of the public on Saturday, January 15, was one of a number of cases revealed from records of unidentified flying objects released by the MoD's UFO unit.

CROWBOROUGH, EAST SUSSEX...

The witness says, "Not quite sure what I saw but at 4.45 AM on morning of 21st January my wife and I were woken to the usual sound of foxes in my back garden." Looking up in the clear sky we both noticed 4 red lights in a perfect straight line moving across the sky, going north to south, followed behind to the right at the same height and speed two other red lights, none of the lights were flashing. There was no noise as I would expect from planes.

Preston Today... 19th January 2005...
Have we been visited by aliens?

Is it a bird? Is it a plane? Or is just a smudge on a windscreen?

Keen photographer Stephen Ratcliffe of Woodstock Close, Lostock Hall, near Preston, reckons he has seen something sinister in the skies above Ribchester.

The 49-year-old claims to have unwittingly snapped four UFOs hovering over the Ribble Valley when he took his digital camera to photograph the snow-covered landscape around the village. The prints, which he says he does not remember taking, show orb-like objects appearing to fall from the sky. But an astronomer at the University of Central Lancashire has cast a shadow over the authenticity of the picture, saying the lighting is not right.

Professor Donald Kurtz, professor in astronomy at the university, said: "Things fall from the sky, bits of space rock and such like, but seldom will someone see it. "There are certainly no aliens flying around Lancashire in their flying saucers." Prof Kurtz added that the UFOs appear to be lit from the top whereas the shadows in the photograph are cast from behind.

But Stephen, who works for Goss Graphics in Preston, is convinced the photos were a result of some kind of paranormal happening. He said: "I bought the camera for £129 last year and it has never had anything like this happen before. I can't remember taking the picture. I am convinced the camera did it on its own. "I was parked on a car park in the middle of the village and it looks like the picture was taken from behind the wheel of my car. "There was nobody else around so I don't know if anybody else saw them."

Changes within SUFOG.

As we arrive in 2005, there are to be one or two changes and some that do not arrive until 2006. At the group meeting held on the 18th January, the following changes were agreed :

We are not changing our name, but we are going to introduce a new logo to the group incorporating the following.

Supernatural
Unexplained
Flying Saucers
Open Minded
Ghosts

The Newsletter is to include 4 extra pages containing news relating to the above heading (Apart from Flying Saucers) and the rest of the magazine will stay the same apart from new headings 'Vintage UFO Cases 1950 – 1970' and 'Global UFO News'.

June 2005 - SUFOG membership to increase from £8.50 to £10. We can no longer subsidise the newsletter. At today's current prices, the newsletter subscription should be around £15.00 a year to cover paper, ink, envelopes, postage etc. So, as you can see, members only pay £8.50 a year therefore we are subsidising each membership to the tune of £6.50 per subscriber and we cannot simply carry on. Currently, with small meeting numbers, unable to afford to put on conferences, invited speakers etc, we are unable to sustain this shortfall. At the end of the day, I think £10 for 6 issues of the newsletter is still a bargain as that equates to £1.60 per issue including postage.. A real bargain. At the end of the day, it is either this or we lose the magazine altogether. One thing to bear in mind is that since the group started in 1992 (14 yrs ago), the newsletter has increased from £5.00 -

£8.50 (That is £3.50 over 14 yrs!!! - value for money - I would say so... Or equivalent to 26p a year!!!). Joint membership & World membership will all rise at the same time.

Joint membership :
£15.00

Family Membership :
£ 20.00

Outside Europe :
£30.00

Other decisions and changes :

- Change group handouts to reflect more what the group is into.
- Concentrate more on advertising - especially through local libraries.
- More structured group meetings as follows :

It was decided to try and attract more members to our meetings (As only 6 people seems to be the norm now!) the meetings will run as follows :

7.40 p.m. - 8 p.m. - Group business.
8 p.m. - 8.40 p.m. - 30 to 40 minute video.
(See Diary column on the right)
8.40 p.m. - 9 p.m. - Break
9 p.m. - 9.20 p.m. - Members 20 minutes.
9.20 p.m. - 9.45 p.m. - Open discussion on the evenings video.

(Times may change)

We are also going to look at the following :

1. SUFOG table at Fetes.
2. Handouts given out in city centre.
3. More Talks.
4. Shop Advertising.
5. Arranging talks in say Winchester or surrounding areas.
6. Group display at the Hampshire Police Open Day.
7. UFO article in the Hampshire Police magazine.
8. Articles and adverts for other magazines (Not that many are left now) - BUFORA, OVNI, UFO Monthly.com, Awareness etc.

If you have any comments, wish to help or have any other ideas to help support the group and especially the magazine, then please contact the editor .

SUFOG DIARY - 2005..

16th February :
TV based UFO Special

16th March : UFO Footage.

20th April : Ghosts.

18th May : SUFOG Material

15th June : Abductions

20th July : Area 51

17th August : Crop Circles

**(20th - 21st August :
SUFOG Avebury Trip)**

21st September : Anti Gravity

19th October : Mystery Animals

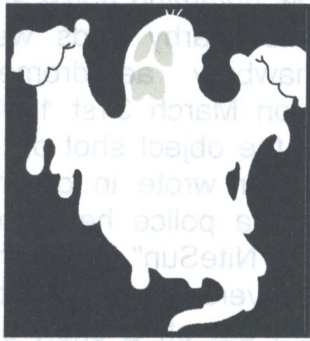

**16th November :
TV based UFO Special**

**14th December : Famous
Cases**

**January 2006 :
Cattle Mutilations**

Please contact the Editor before the above dates to confirm that the Sky Watch / Meeting are still going ahead. This is because Sky Watch's are likely to be cancelled / changed due to weather conditions, and other commitments that the editor is not aware of at the time of publication

NEWSPAPER REVIEWS
BY ERNIE STEARS.

The floodgates came somewhat ajar with the Freedom of Information files being cautiously available on January 1st. Our MOD released to the media and public some interesting UFO stuff many years, some already known to us but some kind of surging out through publicly aroused interest.

THE SUNDAY EXPRESS of January 30th had an excellent two pages which gave us a memorable headline that I'm sure we'll be using of "UFOs don't exist...until you bump into one"... courtesy of my old Witness Support Group mate James Millen who I met in 1994 on a Channel Five UFO program. 'Survivors of some very strange encounters' said Express columnist Michelle Stanistreet, aided and abetted by Philip Mantle of BUFORA, who asked 'would any Government willingly admit there are things flying around it can't explain?' Nick Pope the ex MOD UFO "expert" who said 'a hardcore of sightings defy explanation' while James Millen told of his abduction at the age of eight and the missing time of some hours in 1990 when his wife Pam shared the actual preliminary sighting of eight 'glowing balls' in the Dorset sky. Bonnybridge, Rendlesham, etc were the usual hotspots feature with a Craig Malcolm dedicated enough to build a 20 foot telegraph sighting platform in his

Bonnybridge garden.

THE DAILY MAIL kept things in public view with a full page labelled 'Britain's X Files' by Nick Pope on February 2nd which highlighted RAF pilots etc who saw craft that displayed technology not of this earth among other things. The Three Tornado pilots who had a massive craft that overtook their 600 mph and vanished at 'unimaginable speed' while they were flying from Germany to the UK. A 'vast triangular shaped craft flying at about 200 feet with a low humming noise and firing a thin searchlight beam into nearby fields' was witnessed by the RAF Shawbury aerodrome's Meteorological officer and others on March 31st 1993. The beam was switched off and the object shot off at high speed. A DAILY MAIL reader wrote in on the 8th February and claimed it was a police helicopter chasing a stolen car and using its "NiteSun" beam, the letter writer suggesting the observers were filled by booze in the Mess beforehand. I got off a short but cutting answer to that one!

THE DAILY EXPRESS of 26th January... had already featured a full page by Nick Redfern author of many books, including the best selling "A COVERT AGENDA", who writes 'these new releases represent only a tiny proportion of the vast number of files held by the Government' of UFOs and such things as sea serpents, crop circles, ghostly goings on etc, going back more than 90 years.

THE SUN did a half page headed The Real X Files on January 24th with two alleged UFO photos.. the famous Warminster one and another that looks over a Mediterranean scene. Rendlesham Forest is featured and of course the "hoax" ex ,police car covered in red and blue lights and with a PA system blaring gets a mention! I refuse to mention the hoaxers name! At least we didn't get the lighthouse that allegedly went walkies and sent nearby cattle into frenzy!

THE DAILY MAIL did a two pager headed THE GREAT CLIMATE CONSPIRACY, involving the Sri Lanka disaster and our own floods and storms.....'global warming nonsense' says Michael Crichton.. author, would you believe, of Jurassic Park! Words fail me on that!

THE PSYCHIC NEWS of 29th January ran a two pager on the Preliminary results of the lengthy "ghost watch" by a team of mediums, psychic experts, and sceptics etc at Plymouth's Royal Naval Dockyard,

during 2004. set up at the request of the Establishment's manager. I am endeavouring to purchase a copy of the 132 page report which the PN article says covers those mysterious orbs, a child's screams, freezing cold areas, people being "touched", photos of a misty shape, allegations of "dead" people being "helped" to leave places they were still "trapped" in, in order to reach the "Other Side", The area has been claimed as haunted for many years, increasingly so, or are people getting more "sensitive"?

OK....just a sample of what our forthcoming new paranormal section to the magazine will feature and will welcome your own stories.

A couple more items that I was unable to get to Ernie in time... Steve Gerrard (Editor)

The 'UFO' supposedly seen at RAF Shawbury on 31 March 1993 (Mail) was later identified as a Dyfed-Powys police helicopter following a stolen car down the A 5 between the A 49 junction and Nesscliffe. The observer was using his NiteSun to illuminate the proceedings. A friend who operates from RAF Shawbury adds: The humming noise and high G manoeuvring seems to have been the effect of an over active imagination, almost certainly fuelled by a couple of sniffers in the mess beforehand.' The writer (name given) lives in (town given) Surrey.

The Independent 22nd January... Uncovered At Last: The Sightings Of Strange Flying Objects Found In Britain's 'x-Files'

Mail on Sunday 23rd January... A close encounter with Britain's X-Files...

The Newcastle Journal... 24th January... X-files...

Daily Mail 25th January... Britain's X-Files. Revealed, UFO sightings kept secret for decades by Ministry of Defence...

Northumberland Gazette... January 28... Boulmer Reports Of UFO Sightings Were Hushed Up.

Financial Times.Com 3rd February... MOD's alien files are out of this world...

London Evening Standard 3rd February... UFOs are out there, say real X-Files....

The Independent... 3rd February... The truth is out there: declassified reports of UFO sightings reveal 88 sightings last year...

The Times 4th February... How Britain's X-Files said that UFOs were just a waste of time... Editorial.. Pie in the sky...

Daily Star 4th February... UFOs come in black, yellow and orange...

The Times on Line 4th February... 'How Britain's X-Files said that UFOs were just a waste of time'...

DAILY MAIL letter of 8 Feb 2005 : IT WAS A UFO, HONEST....

The British press was flooded with newspaper articles with regards to the recent release of information under the new Freedom of Information Act. The articles featured such things as 'Police release details of 'aliens in forest'... Airmen reported 'a strange metallic craft'... 'Sent troops to investigate'... 'Brilliant white, cigar-reported'... 'Secret committee dismissed reports of flying saucers more than 50 years ago'... 'Britain's top secret X-Files have been opened up'...

But what difference has this really made to British UFOlogy... In my opinion not a lot... The information that has been released has not opened up UFOlogy in this country. We already know that the British government has been investigating, UFO's, they had their own UFO desk, they had / have a secret department investigating the subject. The information already released has only confirmed that the government had/has an interest and nothing more.

One thing we must be aware of and take on board... The government will only release the

information that they want us to see and no more. If it is too sensitive, then they will just slap on another 20, 50 or 100 yrs onto the files and they will be filed away in that gigantic warehouse of un-opened files in the depths of Whitehall (Or where ever they keep their most top secret files or information).

What was interesting, was The Times Editorial of the 4th February when the editor headed the article... 'Flying Saucers are close encounters with the human imagination'... The article goes on to say that Astronomers (noted what was missing from the article was the names the Astronomers) now agree that there is no evidence for the visitation of Earth by aliens, and that the obsession with UFOs has delayed legitimate research into the possibility of intelligent life elsewhere.... UFOs are imaginative literature, not astronomy... Even the MoD cannot blame us if we occasionally let our imagination run wild... Then the editor publishes a 3/4 page on... Yes, you guessed it.. UFO's... So where does The Editor of the Times stand on this question.. Probably on the planet Mars...

So, there you have it readers... The press went to town on UFO's... One thing that was noted was that of all the request for information applied for under the Freedom of Information Act, UFO's came 3rd in the list. Who are these sad people...? I can think of one or two debunkers who would have applied for the information and had a field day. Lets not get too carried away (Or someone WILL carry you away in a white coat), the MoD and what they hold on file is only 1 star out there in the universe of UFOlogy and do you believe in everything that the government tells you!!!

Britain's Freedom of Information Act came fully into force on 1 January 2005. While this enables people to access numerous UFO documents, it has also led to the National Archives proactively releasing a number of UFO files. The following list details these files, which mainly consist of reports from members of the public:

<http://www.nationalarchives.gov.uk/releases/2005/januaryfoi/list4.htm>

Best wishes,
Nick Pope

Vintage UFO Report...

Date : 25th April 2004

Ref : SG/04/2004

Location : Portsmouth Hill Photograph..

Hello steve we have been going for a watch at the back of Portsmouth Hill at the back of the DRA now we have been up there about five times now and we have seen this white object coming out of nowhere and flying very slowly and it is quite low about plane height no lights just one big round white light moving very slowly but at first we thought that it could be Hubble telescope but it is too low for that and it turns now this white object fly's over us but when we look at it through powerful binoculars it is just one round white light no flashing lights it is not a satellite because it is so low we have seen this object at different times as well this object was brought to our attention by someone who goes fishing in this area would you know if they have any real low low satellites because we can not make this out we have all seen it now after it has gone there are a lot of plain activities in the same flight path now this object is going so slow it might as well be stationary so it gives you a good time to look at it and it doesn't always come the same way but is not the police spotter plane because one time we saw it when the police spotter plane was flying around could you tell us if there is anything flying around like that thanks Bob.

Thanks for the magazine... Brilliant as ever... This is unbelievable, but, regarding Anthony James sighting & photograph taken on Sunday the 25th April at 2.30 p.m.... You are not going to believe this, but at 3 p.m. over Portsmouth Hill, in Portsmouth, Hampshire the same object was photographed by and witnessed by at least 6 people (I have attached a copy of the photo). There surely must be some connection. A UFO seen and photographed in Nottingham at 2.30 p.m. and the same object seen in Portsmouth, Hampshire at 3 p.m. some 30 minutes later? Coincidence? Please see the next edition of our newsletter that contains the full report and the article that appeared in the Portsmouth News... This is surely a great story... Can you pass this onto Anthony for me (We go back a bit as friends) and let him know. I am going to mention your magazine / article in our magazine as I think this is too good to miss by the UFO community. Pity we do not have UFO Magazine around still as this would of made a great article... Headline 'UFO travels across England' - 'And we have the proof'. Please let me know what you think...

After further investigation : UFO - No...

In fact it was a 70 ft black balloon released from Northern France that traveled on the prevailing winds via Portsmouth and Nottingham.

MAGAZINE REVIEWS
BY ERNIE SEARS.

Well, an interesting collection for this issue.. what they lack in numbers is made up, I reckon, in contents.. here goes;

THE NEW BUFORA JOURNAL dated January 2005 steals the Close Encounters of the Third Kind movie on its front cover with that mysterious flat topped hill, waiting for the huge mothership to arrive. Editor Steve Gamble makes a good job of the magazine, although he's standing down after the No 17 issue. Experienced Graham Inglis is set to take over. Steve Gamble has extra items in the current issue.. John Mack's tragic death deserves the comment that his death was an accident... nothing sinister there.. Steve says ten years ago when John was making waves would have been more logical. He wasn't afraid of sticking his head above the parapet and be counted. I HAVE to say John Mack has joined a growing number of UFO luminaries of late who are beaver away with an incredible technology that I'm sure will show results...so there! The Eureka Springs Conference is covered nicely by Norman Oliver with its history up to the present day as 'A Spectrum of UFOlogical thoughts and beliefs'.

Linda Howes is a regular speaker there along with Wendelle Stevens etc, many of whom Norman Oliver is personally acquainted with. Rendlesham is revisited elsewhere in the Journal.. Michael Lewis writes on it, and relates new tales from Larry Warren ("Left at East Gate") which can only add to the weird happenings.. some of which can be experienced still. The Men in Black at Merseyside from his book "A different Sky".. Bluecoat Press 1993. Documented evidence exists of MIB's visiting UK UFO witnesses too. UFO reports, crop circles, my own "The storm that wasn't" appears, Book reviews, etc All in all I notice BUFORA widening it's areas, telling it like it is,.. Steve Gamble nicely tied in my article with similar if not the same but by Geo Falla in "UFO Reports, Interference Effects, The crop circle Link etc. The London Office. BM BUFORA, London, WCIN 3XX for all membership details.

AWARENESS Winter 2004-5 is the Journal of Contact International UFO Research, P0 Box 23, Wheatley, Oxon, OX33 1FL. A smart booklet, eye catching cover, interesting contents, sighting reports, Cellular Memory, Crop Circles, Historical Humanoid Reports by Mike Soper, Letters to the Editor Mike Soper, Egyptologists will enjoy "Seekers of the Ancient Alien God".. again by Mike Soper. Internet or Sky browsers will know of the incredible disappearance of a party of Russian Egyptologists who were filmed looking skywards as they disembarked from their coach on April 23rd 1985 ready to explore a dramatic forecast. They have never been seen since. "Waves of light were also filmed. NOTE; A 2nd "Signs of the Times" Conference takes place on Sunday 20th March at West Oxford Democrats Hall presented by Ellis Taylor with various interesting speakers. Full details on www.oxfordtalks.com

OVNI magazine...£1 plus pp bimonthly is the smart Journal of the Phenomenon Research Association.. founder editor Omar Fowler, a veteran of many years that I've been acquainted with, has given me extra work this time because he hasn't got his list of articles! Omar writes on the Tsunami disaster and questionable coincidence of it being exactly one year to the day almost to the minute when the Iran earthquake that killed 26,000. Hmmm! Then he writes on al this odd business of aliens, huge triangles, underground caverns, along with stories of aliens visiting India for thousands of years and much much more! I dunno, Omar. Since Busty Taylor gave him this some ages ago, s news.....'most of the superpowers have been visited' Oh, get on, mate. . Sighting reports on BBCRADIO DERBY contain FIVE dramatic onesone in 2004, another older one

involving an alleged landing. A startling photo of a TRAIN ON MARS! Or, at least, a railway sleeper! A Canadian colleague of Omar's relates his MONTHLY 1994 sightings of an orange ball that hovered and moved towards him when he flashed his one million candlepower spotlight. The beginning of many more sightings and events to come. A Leo Noury writes in Ovni on "UFO Research a Dangerous Profession!" Hmmm Enough of that thanks! At eighty I'm living on the edge! Jimmy Hendrix, and microwaves are two more items doing my head in! Let's finish OVNI I with the back page Tale Enders Earth Rotation altered!. 'Course! I've got colleagues who agree with ME! Mississippi.. strange sound and triangle. "WHO ARE THEY?" Well, you can take your pick of handfuls of 'em. Margaret Fry's new book.. MUST get it, where's my cheque book? Videos of balls of light changing to triangles at Filey. They DO change...I've had one like that described by witnesses on the occasion of one of my not long ago abductions. OK...enough! OVNI from 94 The Circle, Sinfin, Derby, DE24 9H

UFO MONTHLY .COM... Gary HESELTINE's growing fast bi-monthly downloaded hard copy lies before me.. thanks to Steve G.. NOVEMBER DECEMBER , A GREAT issue.. PAGES of old and not so reports by the POLICE FORCES of the UK? What MORE does one need? 23 (There's that figure AGAIN!) pages of Gary's database containing famous and not known encounters, INTERESTING to note TODMORDEN showing up a few times.. WHY? What is there up there? Disused mines might contain certain minerals. The mutilated ponies on Dartmoor in 1977. I have a piece from our ECHO which I wrote. The strange experiences of researcher Robert Hulse. SOME of which relate to MINE! We have a HULSE ROAD in SOUTHAMPTON where I booked cabaret and bands in the seventies. UFO Archives. Website news stories worldwide. UFO MONTHLY.com from Suite 226, 57 Great George Street, Leeds, West Yorkshire, LS1 3AJ £1.50.

NEXUS for February March is stunner! NO TIME for details.. contents include Global News, Phantom Disease, Truth About Vaccines cover-up. Short History of the Round Table. Siren Song of The Earth, Siberias Valley of Death. THE TALL WHITE EXTRATERRESTIALS.. and HERE WE GO! BOOK REVIEWS. DVD REVIEWS.MUSIC REVIEWS. Phew! www.nexusmagazine.com for IMMEDIATE contact details.

SPANISH SIGHTING BY SUFOG MEMBER.
Wednesday 19th January 05

Gillian (a SUFOG member) and husband MALCOLM were over Spain at 2.30 p.m. on their way home after a Canary Island holiday when they were startled to see a huge black object arrive from below., at 34,000 feet, and take up station alongside them. Their 'plane was flying at 540 mph. Two passengers behind them exclaimed at the same time "What is that?" Gillian and Malcolm described the object as a 'rectangle' which then changed to a 'tube' and veered away to the right and vanished. Malcolm has worked all his life with British Aerospace and this craft represented nothing he'd ever seen before. It has to be said the couple have a known history... some witnessed by me.. of paranormal encounters and at least two very close encounters with a "craft" over their home which is just a short distance from mine. All details have been passed to our founder and editor Steve G. who may be able to keep us up to date. I must admit I "jokingly" said to Gillian "they" were 'looking for you'! She'd already thought of that!

BY the way, the couple spoke to the stewardess about the incident and she said she just served the drinks and had seen nothing.

Ernie Sears (PRO SUFOG)

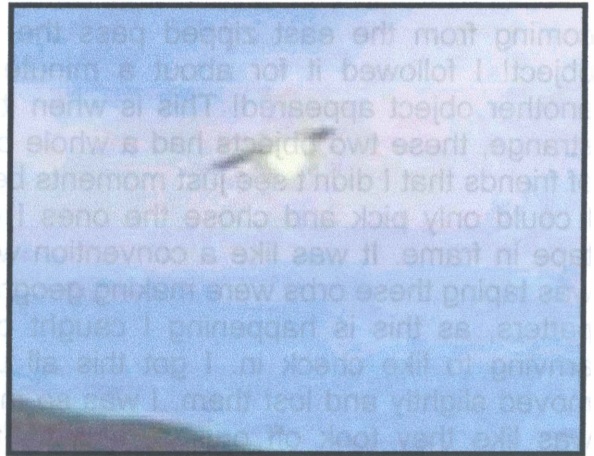

WORLD NEWS AND REPORTS...**Planeta UFO... 31st January 2005...****MEXICO: MORE UFO VIDEO...**

An important sighting was recorded by professional cameramen from Televisa in Mexico City on January 9, 2005, as a UFO flew over the Plaza Mexico bullring between 5:45 and 6:00 pm.

On that same day, Mexican researcher Pedro Avila Rubio obtained impressive video evidence of apparently the very same unidentified flying object at an altitude of 4000 meters over the municipality of Tlalnepantla in the state of Mexico at 3:45 p.m.

The witness described it as a sphere with protuberances in its lower side - making the analogy of a pea with corrugated edges - which was precisely in the San Mateo air corridor, adding that no aircraft appeared during the recording.

The strange flying object flew slowly in a north-south direction and the sky was completely clear. This is highly significant evidence, since it completely discards the possibility of viewer error and that a weather balloon could be mistaken for a UFO. It is my belief that Pedro Avila is the first person to have obtained video evidence of what occurred on January 9 - a result of his perseverance and experience in scanning the skies...

images of the strange object from Carlos Bruna. They are still under analysis.

"The fact is that when they informed me of the case, I only expected to see the alleged evidence. I thought it could correspond to one of many explained phenomena. But I think the photo shows some interesting details," observes Rodrigo Fuenzalida, AION's director.

"When I received the material, I found that the mountains were too well outlined, and the colours had a curious clarity. However, upon listening to Carlos, the percipient, I found his account to be an honest one. I think the photo is genuine. Now the challenge consists in determining the origin of the stimulus captured by the camera's eye," he remarked.

According to AION's representative in Chile's 1st Region, Mario Pizarro, the UFO image is genuine and studies conducted on site suggest that the object had a diameter of between 3 and 4 meters.

Terra.cl... 8th February 2005...**Incredible UFO Photo In Northern Chile...**

This extraordinary chance photo was taken in the northern part of our country and shows the transit of an unidentified flying object (TERRA.cl)

IQUIQUE, February 8, 2005.- On Friday, February 4, Carlos Bruna, an official with the Controllershship of the Republic in the city of Iquique, visited the Tres Islas Beach, some 10 minutes away from this northern city, to take a break. Since he had acquired a digital camera in recent days, he began taking photos of the mountains and their contrast with the blue sky.

To his surprise, upon loading the photos into his computer, he saw that one of the images showed a lens-shaped object, expelling some sort of white energy, was flying high above one of the mountains.

The AION CHILE organization received the

Arizona - Daylight Multiple Objects

PHOENIX – The witness went outside to look at 12:33 PM, and saw a slow moving object on January 20, 2005. The witness says, "I grabbed the camera and taped this object for a little bit. It was always moving north or up and from how slow it moved I thought maybe a balloon. Just when I was going to stop tape, this other object

coming from the east zipped pass the other object! I followed it for about a minute until another object appeared! This is when it gets strange, these two objects had a whole bunch of friends that I didn't see just moments before. I could only pick and chose the ones I could tape in frame. It was like a convention while I was taping these orbs were making geographic patters, as this is happening I caught others arriving to like check in. I got this all until I moved slightly and lost them. I was so mad! It was like they took off on me, I couldn't find them again.

California - Five Disks SOUTH EL MONTE..

It was a warm sunny day on January 16, 2005 at 3:30 PM...and the sky was clear. Two friends and I had been snowboarding and were relaxing in the Jacuzzi when we saw two objects very high up in the sky. They were white specks that could be balloons, but after a minute of observing they were at the same spot. I pointed them out and the guys said they were stars. It was broad daylight! So, I grabbed my binoculars and saw three more high in the sky! My friend got his binoculars and gave them to me because they had a better optical lens. I was able to distinguish that they were in fact circular disk-like form and white in colour and they moved slightly and when they moved they left a tiny trail which disappeared very quickly. Only one out of the 4 had what appeared to be a blue circular disk-like object sort of affixed to it moving half way around it back and forth.

I thought about God's Word and what Ezekiel described what he saw and his description of highly polished bronze "flying wheels" with eyes (portholes) roundabout (all around). In five minutes they were right above our location and four stayed together while the one with the "blue" was at a distance from them. Five minutes later they headed east.

Canada - Round Ball of Light over Newfoundland... MOUNT PEARL...

Two witnesses just came back from sliding and I looked up and saw a round ball of light, it hovered for a few seconds then took off really fast and disappeared on January 12, 2005, at 5

PM. It was too early to be a shooting star because it wasn't dark out and there were no other stars or street lights on. The weather was clear with some clouds and no wind. The UFO was located in the east, and the entire event lasted about 5 seconds. The UFO was the shape of a round ball of light and made no sound whatsoever.

CALGARY, ALBERTA -- On January 11, 2005, at 5:08 PM, my mother and I had just come from a clothing store. As I came out, with my mother in tow, I noticed there were no clouds around, and the sky was an orangey yellow glow. As I scanned the parking lot, I happened to see an odd looking cloud in the SW part of the sky. As I pointed out this greyish cigar to my mother, she was looking in the wrong direction. When she did see what I was pointing out to her she said, Oh that's just a cloud. I responded, that's no ordinary cloud. I watched as it descended the stairs and how it changed shape and started moving upwards. As I unlocked the van's doors, I still kept a watch on it. As the cloud disappeared, I saw a greyish cigar like shape going straight up in the sky.

There was no contrail or chemtrail behind them, and this was no plane. Because it disappeared straight up and out of sight. I have never seen anything shoot straight up like that before...

Cyprus - Flash Of Light LIMASSOL...

The observers were watching the sky near the Constellation Orion when they saw a bright flash appear for only one second at a time, then it appeared again, I have timed it and it appeared every three minutes at 10 PM on January 26, 2005. I know that the stars move from left to right but this light moved from right to left and moved up at an angle. It, then, moved at a different angle three minutes later. We don't know what it was and I have tried to film it, but my camcorder isn't good enough to pick it up.

Paperback UFO books for sale.

UK Postage : £2.50 (Per book)
Unless otherwise stated.

I am offering these items to SUFOG members at a much reduced rate as some of them can be as much as 50% more expensive from specialist sells. All books will be sold on a first come - first served basis and money and cheques will be returned if the items are no longer available).

Please send payment to the Editorial address and include an email address if possible so that I can keep you informed as to when item(s) posted.

They are only available until the 28th of March...

Many thanks

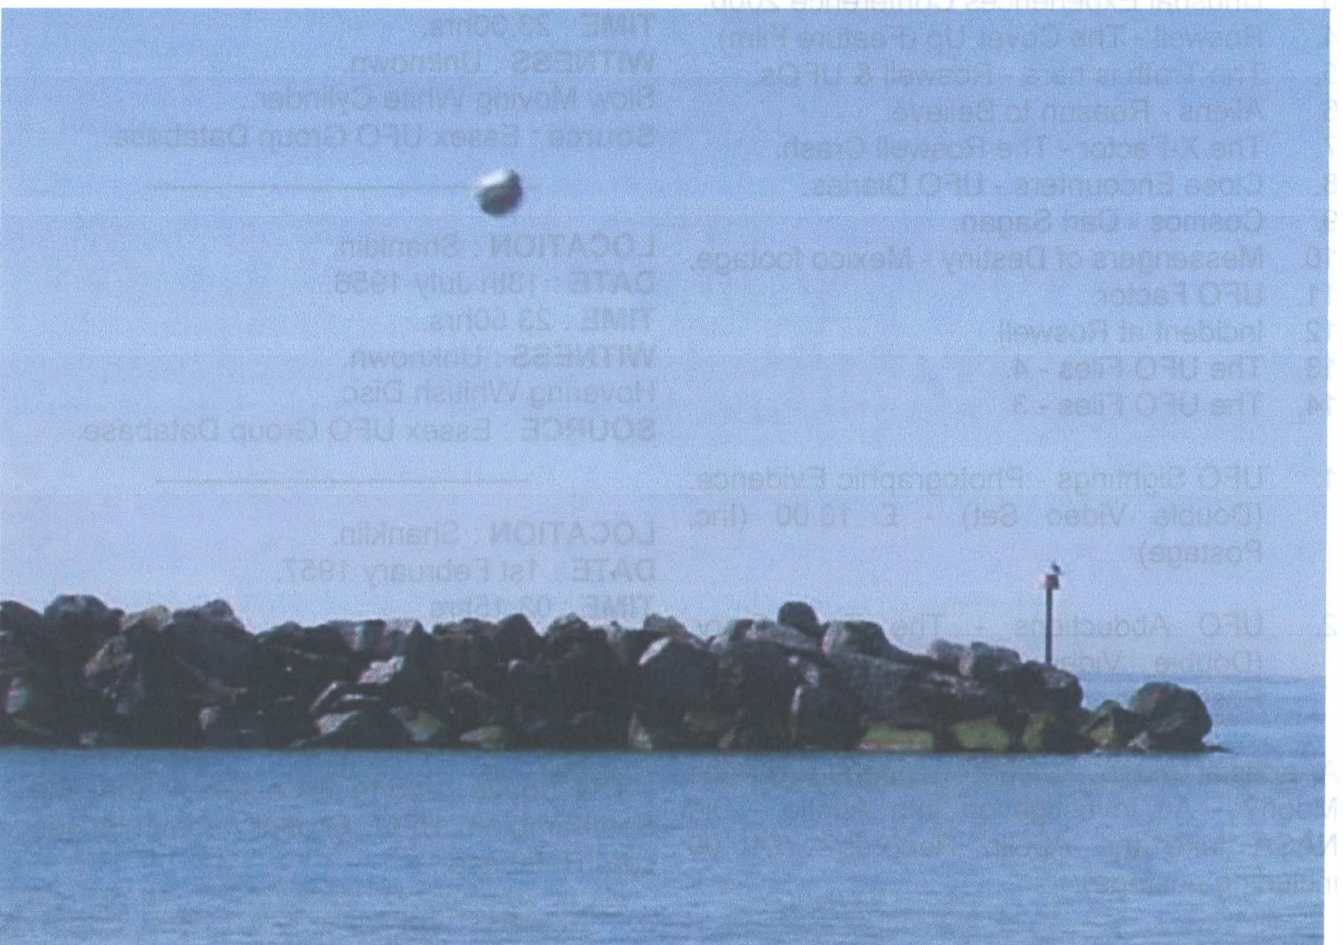

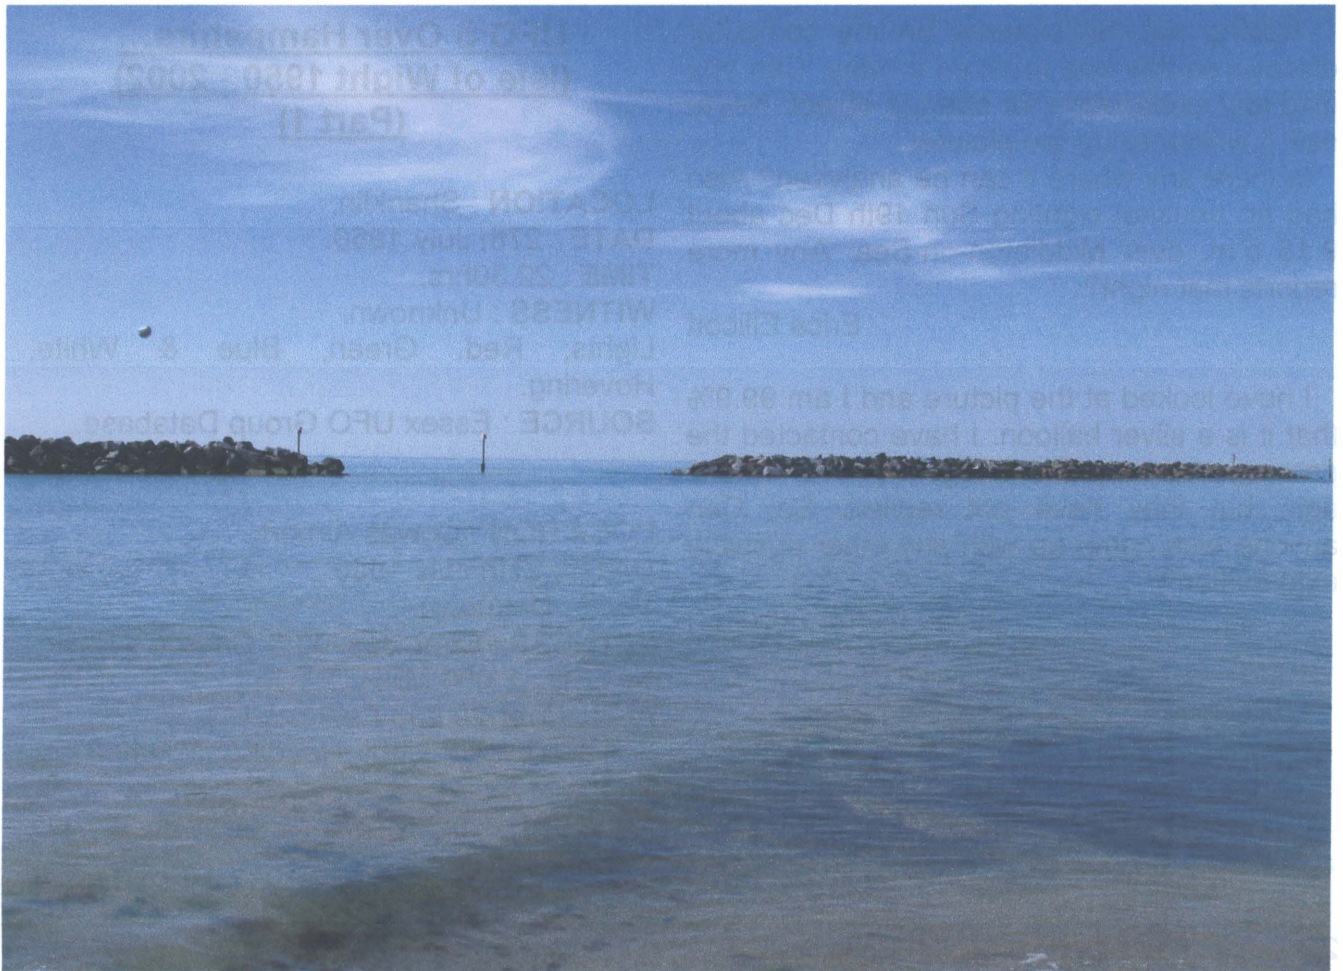

Steve Gerrard (Editor)

Finland - UFO Seen on Field

HELSINKI... My friend and I were walking our dogs at 5 PM, on January 17, 2005, in an open field, and suddenly strange lights appeared and the dogs started to bark. The lights were coming from the sky and all we could see was this bright light upon us. It was like some kind of spotlight and it lasted for about ten seconds and then something happened and the light went off. We could see the whole "craft". The dogs stopped barking and the craft went away with great speed and flames that were blue (maybe gas powered). My friend and I were totally shocked.

Kenya - Two Orange Flashes

NAIROBI – The witness was sitting with his son looking up for the first evening star in a clear sky on January 7, 2005, at 8:40 PM. I, then, observed a seemingly orange coloured flash of perhaps two seconds dissolving into a faint tail light moving away. It was moving north and strangely enough, less than 30 seconds later, I saw this repeated at a slightly different position but quite close to the first flash. I thought it might be two rocket stages following each other back into the earth's atmosphere.

Having put my pictures on my computer discovered this one in taken in May. Can you give any explanation for strange object. Never saw it whilst taking the picture!

Is there any where it can be analysed? Also had an unusual sighting Sun 19th Dec about 9.15 p.m. over Middleton-on-Sea. Any more reports that night?

Erica Ellicott

I have looked at the picture and I am 99.9% that it is a silver balloon. I have contacted the person who sent the images over 2 weeks ago, but they have not replied. So, Can anyone else come up with any other possible explanation?

Steve Gerrard (Editor)
